1. CORPORATE INFORMATION

SJ GROUP Joint Stock Company (“the Company”) was a joint stock company incorporated under the Law on Enterprise of Vietnam in pursuant to the Enterprise Registration Certificate No. 0103002731 issued by Hanoi Department of Planning and Investment on 8 August 2003. The Company also subsequently received amended Enterprise Registration Certificates No. 0101399461 with the 13th amendment dated 11 April 2024 as the latest.

The Company's shares are listed on the Ho Chi Minh City Stock Exchange under name SJS.

The current principal activities of the Company are:

- ▶ Real estate business;
- ▶ Real estate service business;
- ▶ Business and operation of services for housing, urban and industrial zone.

The Company's average course of business cycle for the real estate activities commences from the date of obtaining the investment license, carrying out land clearance, undertaking infrastructure construction to the completion of the project. Consequently, the Company's course of business cycle may last over 12-month.

The Company's normal course of business cycle for other activities is 12-month.

The Company's headquarter is located at Lot TT2, Nam An Khanh New Urban area, An Khanh commune, Hoai Duc district, Hanoi, Vietnam.

The seasonal nature of operations impacts the report

Due to the characteristics of the real estate industry, revenue from property transfers is contingent upon the completion status of real estate projects and market conditions at the times the projects are offered for sale. Conversely, revenue from leasing and providing real estate management services is anticipated to remain stable throughout the year unless the Company and its subsidiaries introduce new investment products to the market.

CORPORATE INFORMATION (Continued)

Corporate structure

As at 31 December 2024, the Company has 5 dependent branches (as at 31 December 2023: 5 dependent branches) with detail information as follow:

2. BASIS OF PREPARATION

2.1 Accounting standards and system

The consolidated financial statements of the Company and its subsidiaries ("the Group") expressed in Vietnam dong ("VND"), are prepared in accordance with Vietnamese Enterprise Accounting System and Vietnamese Accounting Standards issued by the Ministry of Finance as per:

- ▶ Decision No. 149/2001/QĐ-BTC dated 31 December 2001 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 1);
- ▶ Decision No. 165/2002/QĐ-BTC dated 31 December 2002 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 2);
- ▶ Decision No. 234/2003/QĐ-BTC dated 30 December 2003 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 3);
- ▶ Decision No. 12/2005/QĐ-BTC dated 15 February 2005 on the Issuance and Promulgation of Six Vietnamese Accounting Standards (Series 4); and
- ▶ Decision No. 100/2005/QĐ-BTC dated 28 December 2005 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 5).

Accordingly, the accompanying consolidated financial statements, including their utilisation are not designed for those who are not informed about Vietnam's accounting principles, procedures and practices and furthermore are not intended to present the financial position and results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

2.2 Applied accounting documentation system

The Company's applied accounting documentation system is the General Journal system.

2. BASIS OF PREPARATION *(Continued)*

2.3 Fiscal year

The Group's fiscal year applicable for the preparation of its consolidated financial statements starts on 1 January and ends on 31 December.

2.4 Accounting currency

The consolidated financial statements are prepared in VND.

2.5 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries for the [year ended 31 December 2023].

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continued to be consolidated until the date that such control ceases.

The financial statements of subsidiaries are prepared for the same reporting year as the parent company, using consistent accounting policies.

All intra-company balances, income and expenses and unrealised gains or losses result from intra-company transactions are eliminated in full.

Non-controlling interests represent the portion of profit or loss and net assets not held by the Group and are presented separately in the consolidated income statement and within equity in the consolidated balance sheet.

Impact of change in the ownership interest of a subsidiary, without a loss of control, is recorded in undistributed earnings.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash in banks and short-term, highly liquid investments with an original maturity of not more than three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

3.2 Receivables

Receivables are presented in the consolidated financial statements at the carrying amounts due from customers and other debtors, after provision for doubtful debts.

The provision for doubtful debts represents amounts of outstanding receivables at the consolidated balance sheet date which are doubtful of being recovered. Increases or decreases to the provision balance are recorded as general and administrative expenses in the consolidated income statement. When bad debts are determined as unrecoverable and accountant writes off those bad debts, the differences between the provision for doubtful receivables previously made and historical cost of receivables are included in the consolidated income statement.

3.3 Inventories

Real estate property

Real estate that is purchased or constructed for sale in the normal course of the Company's and its subsidiaries' operations, not for leasing or awaiting appreciation, is recognized as real estate inventory at the lower of cost to bring each product to its present location and condition and its net realizable value.

The cost of real estate inventory includes the direct costs of constructing the property and the allocated general expenses based on the corresponding area of that property, specifically as follows:

- ▶ Land use fees and land rental expenses ;
- ▶ Construction costs paid to contractors; and
- ▶ Interest expenses, consulting and design fees, site clearance and leveling costs, compensation for land clearance, consulting fees, land transfer taxes, general construction management expenses, and other related costs.

Net realizable value is the estimated selling price in the ordinary course of the business, based on market price discounted for the time value of money if significant at the consolidated balance sheet date, and less cost to complete and the estimated selling price.

The cost of the real estate property sold recognized in the consolidated income statement based on the direct costs of constructing that property and the allocated general expenses based on the corresponding area of that property.

Provision for obsolete inventories

An inventory provision is created for the estimated loss arising due to the impairment of value (through obsolescence, etc.) of raw materials, finished goods, and other inventories owned by the Group, based on appropriate evidence of impairment available at the consolidated balance sheet date..

Increases or decreases to the provision balance are recorded into the cost of goods sold account in the consolidated income statement. When inventories are expired, obsolescence, damage or become useless, the difference between the provision previously made and the historical cost of inventories are included in the consolidated income statement.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**3.4 Tangible fixed assets**

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of a tangible fixed asset comprises its purchase price and any directly attributable costs of bringing the tangible fixed asset to working condition for its intended use.

Expenditures for additions, improvements and renewals are added to the carrying amount of the assets and expenditures for maintenance and repairs are charged to the consolidated income statement as incurred.

When tangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the consolidated income statement.

3.5 Intangible fixed assets

Intangible fixed assets are stated at cost less accumulated amortisation.

The cost of an intangible fixed asset comprises its purchase price and any directly attributable costs of preparing the intangible fixed asset for its intended use.

Expenditures for additions, improvements are added to the carrying amount of the assets and other expenditures are charged to the consolidated income statement as incurred.

When intangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the consolidated income statement.

3.6 Depreciation and amortisation

Depreciation of tangible fixed assets and amortisation of intangible fixed assets are calculated on a straight-line basis over the estimated useful life of each asset as follows :

Land use rights	45 years
Buildings and structures	6 - 50 years
Machinery and equipment	3 - 7 years
Means of transportation	5 - 7 years
Office equipment	3 - 5 years
Others	3 - 5 years

3.7 Investment properties

Investment properties are stated at cost including transaction costs less accumulated depreciation.

Subsequent expenditure relating to an investment property that has already been recognised is added to the net book value of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Group.

Depreciation of investment properties are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Buildings and structures	25 years
--------------------------	----------

For long-term lease of investment properties which the Group receives rental fee in advance for many periods and rental income is recognised one at the entire rental amount received in advance as presented

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**3.7 Investment properties (Continued)**

in Note 3.17, depreciation and amortisation of these investment properties are recognised with entire amount at the point of revenue recognition.

Investment properties are derecognised when either they have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the assets is recognised in the consolidated income statement in the year of retirement or disposal..

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by ending of owner-occupation, commencement of an operating lease to another party or ending of construction or development. Transfers are made from investment properties when, and only when, there is change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale. The transfer from investment property to owner-occupied property or inventories does not change the cost or the carrying value of the property for subsequent accounting at the date of change in use.

3.8 Borrowing costs

Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds. Borrowing costs are recorded as expense during the year in which they are incurred, except to the extent that they are capitalised as explained in the following paragraph.

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that necessarily take a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset.

3.9 Prepaid expenses

Prepaid expenses are reported as short-term or long-term prepaid expenses on the consolidated balance sheet and amortised over the period for which the amounts are paid or the period in which economic benefits are generated in relation to these expenses.

3.10 Business combinations and goodwill

Business combinations are accounted for using the purchase method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange plus any costs directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination are measured initially at fair values at the date of business combination.

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost the business combination over the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the consolidated income statement. After initial recognition, goodwill is measured at cost less any accumulated amortisation. Goodwill is immediately recorded as production (if value is small) or amortised over 10-year period on a straight-line basis (if value is significant). The parent company conducts the periodical review for impairment of goodwill of investment in subsidiaries. If there are indicators of impairment loss incurred is higher than the yearly allocated amount of goodwill on the straight-line basis, the higher amount will be recorded in the consolidated income statement.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**3.11 Investments***Investments in associates*

The Group's investment in its associate is accounted for using the equity method of accounting. An associate is an entity in which the Group has significant influence that is neither subsidiaries nor joint ventures. The Group generally deems they have significant influence if they have over 20% of the voting rights.

Under the equity method, the investment is carried in the consolidated balance sheet at cost plus post acquisition changes in the Group's share of net assets of the associates. Goodwill arising on acquisition of the associate is included in the carrying amount of the investment. Goodwill is not amortised and subject to annual review for impairment.

The share of post-acquisition profit/(loss) of the associates is presented on face of the consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividend/profit sharing received or receivable from associates reduces the carrying amount of the investment.

The financial statements of the associates are prepared for the same reporting period and use the same accounting policies as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

Held-for-trading securities and investments in other entities

Held-for-trading securities and in securities and investments in other entities are stated at their acquisition costs.

Provision for diminution in value of investments

Provision of the investment is made when there are reliable evidences of the diminution in value of those investments at the balance sheet date.

Increases or decreases to the provision balance are recorded as finance expenses in the consolidated income statement.

Held-to-maturity investments

Held-to-maturity investments are stated at their acquisition costs. After initial recognition, held-to-maturity investments are measured at recoverable amount. Any impairment loss incurred is recognised as finance expenses in the consolidated income statements and deducted against the value of such investments.

3.12 Payables and accruals

Payables and accruals are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Group.

3.13 Provisions*General*

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**3.13 Provisions (Continued)**

When the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the consolidated income statement net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance expense.

Retrenchment allowance

Retrenchment allowance for employees who have been worked for more than 12 months at Group is accrued at the rate of one month's salary for each year of service qualified for retrenchment allowance and the minimum amount for each employee is two months' salary in accordance with the Labour Code and related implementing guidance. The salary as the basis for calculation of retrenchment allowance is adjusted at the end of each reporting year following the average salary of the last 6-month period up to the reporting date.

This provision is used to settle the retrenchment allowance to be paid to employee upon termination of their labour contract following Article 47 of the Labour Code.

3.14 Foreign currency transactions

Transactions in currencies other than the Group's reporting currency of VND are recorded at the actual transaction exchange rates at transaction dates which are determined as follows:

- ▶ Transactions resulting in receivables are recorded at the buying exchange rates of the commercial banks designated for collection;
- ▶ Transactions resulting in liabilities are recorded at the selling exchange rates of the commercial banks designated for payment; and
- ▶ Payments for assets or expenses without liabilities initially being recognised is recorded at the buying exchange rates of the commercial banks that process these payments.

At the end of the year, monetary balances denominated in foreign currencies are translated at the actual transaction exchange rates at the balance sheet dates which are determined as follows:

- ▶ Monetary assets are translated at buying exchange rate of the commercial bank where the Group conducts transactions regularly; and
- ▶ Monetary liabilities are translated at selling exchange rate of the commercial bank where the Group conducts transactions regularly.

All foreign exchange differences incurred are taken to the consolidated income statement.

3.15 Treasury shares

Own equity instruments which are reacquired (treasury shares) are recognised at cost and deducted from equity. No gain or loss is recognised in profit or loss upon purchase, sale, re-issue or cancellation of the Group's own equity instruments.

3.16 Appropriation of net profits

Net profit after tax (excluding negative goodwill arising from a bargain purchase) is available for appropriation to investors/shareholders after approval by the appropriate level of authority/in the annual general meeting, and after making appropriation to reserve funds in accordance with the Company's Charter and Vietnam's regulatory requirements.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

3.16 Appropriation of net profits (Continued)

The Group maintains the following reserve funds which are appropriated from the Group's net profit as proposed by the Board of Directors and subject to approval by shareholders at the annual general meeting:

Investment and development fund

This fund is set aside for use in the Group's expansion of its operation or of in-depth investment.

Bonus and welfare fund

This fund is set aside for the purpose of pecuniary rewarding and encouraging, common benefits and improvement of the employees' benefits, and presented as a liability on the consolidated balance sheet.

3.17 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, excluding trade discount, rebate and sales return. The following specific recognition criteria must also be met before revenue is recognised:

Transfer real estate

Revenue is recognised when the significant risks and rewards of ownership of the real estate have passed to the buyer, usually upon the delivery of the real estate, and the ability to collect the real estate transfer price is reasonably assured.

If a transaction does not meet the above revenue recognition criteria, progress payments received from customers are recorded as customer prepayments on the consolidated balance sheet until all the aforementioned conditions are met.

Rendering of services

Where the contract outcome can be reliably measured, revenue is recognised by reference to the stage of completion. Stage of completion is measured by reference to the labour hours incurred to reporting date as a percentage of total estimated labour hours for each contract.

Where the contract outcome cannot be reliably measured, revenue is recognised only to the extent of the expenses recognised which are recoverable.

Interest

Revenue is recognised as the interest accrues (taking into account the effective yield on the asset) unless collectability is in doubt.

Dividends

Income is recognised when the Group's entitlement as an investor to receive the dividend is established.

Periodic rental income

Rental income arising from operating leases is recognised in consolidated income statement on a straight line basis over the terms of the lease.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**3.17 Revenue recognition (Continued)***Rental income recognised one time*

For lease of assets which the Group receives rental fee in advance for many periods and the lease periods cover more than 90% of the useful life of the assets, rental income is recognised one time at the entire rental amount received in advance when all these conditions are met:

- The lessee is not entitled to cancel the lease contract and the Group has no obligation to repay the amount received in advance in all cases and in all forms;
- The amount received in advance from the lease is not less than 90% of the total rental amount expected to be fulfilled under the contract during the lease term and the lessee must pay the entire amount of lease within 12 months from the beginning of the lease;
- Almost all the risks and benefits associated with ownership of the leased asset are transferred to the lessee; and
- The Group must estimate relatively the full cost of the lease.

3.18 Cost of goods sold for the transferred real estate

The cost of land and assets on land/apartments sold includes all direct expenses incurred for land development activities and housing or expenses that can be reasonably allocated to these activities, including:

- ▶ Land costs and land development expense;
- ▶ Construction costs and related construction expenses; and
- ▶ Other related costs arising during the formation of the real estate such as expenses from current and future land development activities and constructions of the project (like expenses for the development of common technical infrastructure and mandatory land fund development costs for public purposes, etc.).

3.19 Taxation*Current income tax*

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted as at the consolidated balance sheet date.

Current income tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Group to set off current tax assets against current tax liabilities and when the Group intends to settle its current tax assets and liabilities on a net basis.

Deferred tax

Deferred tax is provided using the liability method on temporary differences at the consolidated balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- ▶ where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the related transaction affects neither the accounting profit nor taxable profit or loss; and

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**3.19 Taxation (Continued)**

- ▶ in respect of taxable temporarily differences associated with investments in subsidiaries and associates, and interests in joint ventures where timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carried forward unused tax credit and unused tax losses, to the extent that it is probable that taxable profit will be available against which deductible temporary differences, carried forward unused tax credit and unused tax losses can be utilised, except:

- ▶ where the deferred tax asset in respect of deductible temporary difference which arises from the initial recognition of an asset or liability which at the time of the related transaction, affects neither the accounting profit nor taxable profit or loss; and
- ▶ in respect of deductible temporarily differences associated with investments in subsidiaries, associates, and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Previously unrecognised deferred tax assets are re-assessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered .

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled based on tax rates and tax laws that have been enacted at the balance sheet date.

Deferred tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the deferred tax is also dealt with in the equity account.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Group to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on:

- ▶ either the same taxable entity; or
- ▶ when the Group intends either settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

3.20 Segment information

A segment is a component determined separately by the Company which is engaged in providing products or related services (business segment) or providing products or services in a particular economic environment (geographical segment), that is subject to risks and returns that are different from those of other segments.

The Group's principal activities is real estate business and other related services. In addition, these activities are mainly taking place within Vietnam. Therefore, the Group's risks and returns are not impacted by the Group's products that the Group is manufacturing or the locations where the Group is trading. As a result, the Group's management is of the view that there is only one segment for business and geography and therefore presentation of segmental information is not required.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

3.21 Related parties

Parties are considered to be related parties of the Group if one party has the ability to, directly or indirectly, control the other party or exercise significant influence over the other party in making financial and operating decisions, or when the Group and other party are under common control or under common significant influence. Related parties can be enterprises or individuals, including close members of their families.

The Company has not determined the fair value of these investments because the shares of these companies are not listed on the market.

- (*) According to Resolution No. 028/2016/NQ-GIC-ĐHĐCĐ dated June 28, 2016 of Global Insurance Corporation (GIC), the charter capital was increased from VND 320 billion to VND 400 billion at a rate of 25% from the surplus capital, accordingly the number of shares of the Company was increased by 220,000 shares (the total number of shares the Company holds at GIC after the capital increase is 1,100,000 shares, accounting for 2.75% of the charter capital).

Pursuant to Resolution No. 015/2021/NQ-GIC-ĐHĐCĐ dated May 13, 2021 of the General Meeting of Shareholders of Global Insurance Corporation and Resolution No. 028/2021/NQ-GIC-ĐHĐCĐ dated August 20, 2021 on implementing the plan to increase charter capital by issuing individual shares, accordingly, GIC issued to increase charter capital from VND 400 billion to VND 465 billion, equivalent to issuing 6,500,000 shares at an issuance price of VND 15,385/share. The total number of shares purchased by the Company is 178,750 shares (corresponding to a total investment value of VND 2,750,068,750). Thus, the total number of shares the company currently holds at GIC is 1,278,750 shares, equivalent to VND 12,787,500,000 in par value, accounting for 2.75% of the charter capital at GIC.
